

H4 manual freeze — 26 atom-relevant topics

Run: v4_l12_granular_final_call49 — 26 topics. No LLM adjudication.

Decision rules (manual freeze – no LLM)

1. H4_5 / H4_6 (external protection) REQUIRE a concrete EXTERNAL threat (attacker, danger, legal/social adversary). No external threat → not H4_5/H4_6.
2. H4_5a (protective commitment) = explicit safety/welfare responsibility pledge WITHOUT a concrete external threat strong enough for H4_5/H4_6.
Do not code H4_5a from generic promise vocabulary alone ("I'll help", "I promise").
3. Partner-as-danger or "for their own good" restriction → H4_10 / H4_11, not protection.
4. Claiming / jealousy without coercion → H4_7 / H4_8; coercion → H4_9-H4_11.
5. Contradiction trap: if evidence shows no external threat, do NOT keep H4_5/H4_6.
6. KEEP = retain in construct atoms under final_code.
REMOVE = drop from atoms (applied as H4_0).

1. External protection (H4_5 / H4_6)
