

Could H1-H6 still be measured after contextual refinement?

Hypothesis	Status	Topics	Note
H1	● Viable	2 / 0	Viable emotional-vs-explicit ratio after refinement
H2	— Unmeasurable	—	Strict HEA/payoff has zero mapped topics
H3	— Unmeasurable	11 / 0	Material-side denominator empty after freeze
H4	○ Thin	1 / 3	Thin protection atom (t119); ratio provisional
H5	● Viable	20 / 2	Viable darkness-vs-tenderness contrast
H6	● Viable	18 rising / 8 falling	Viable refined arc contrast (RARC)
