

H3 manual freeze — emotional vs material (42 topics)

Run: v4_l12_granular_final_call49 — 42 topics. No LLM adjudication. Review material vs emotional dichotomy.

Decision rules (manual freeze – emotional vs material dichotomy)

1. Classify FUNCTION, not object. A house/gown/paycheck may be emotional belonging, material provision, appearance/status, or off-target.
2. Emotional (S1-S4): reassurance, belonging, trust, commitment-as-safety. KEEP on emotional side only if the topic primarily soothes / affirms / binds the relationship emotionally – not money or housing transfer.
3. Material (S8/S9): relationship-directed transfer of money/housing/necessities as security for a partner. REJECT merely being rich, luxury display, occupational status, workplace talk, or objects without a provision function.
4. Appearance / status (S12-S15): display, grooming, prestige, gifts-as-tokens, workplace rank – keep SEPARATE from material provision.
5. Contradiction trap: do not KEEP a topic on the material side if sentences show only appearance, status, or job-seeking without provision-to-partner.
6. KEEP = retain under final_code. REMOVE = drop from H3 atoms (S0).
